JP Automatics are proud to announce the addition of moulded piston sets to our already large product range for General Motors 5L40E Automatic Transmission.

After much research and development with customers and suppliers JP Automatics are able to offer much sort after quality replacement parts long before any OE source is available.

To give further assurance of quality our new product has already been tried and tested covering many rigorous miles in the field.

This set includes all the pistons for two wheel drive and four wheel drive applications.
